

# CONNECT CLOUD STORAGE

Learn how to connect Google Drive or OneDrive to your Promethean account.

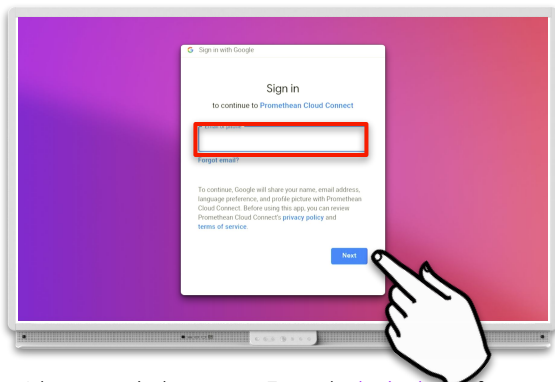

By linking your cloud-based drives, you can save and open files directly from and to the cloud, when you are signed into your ActivPanel.

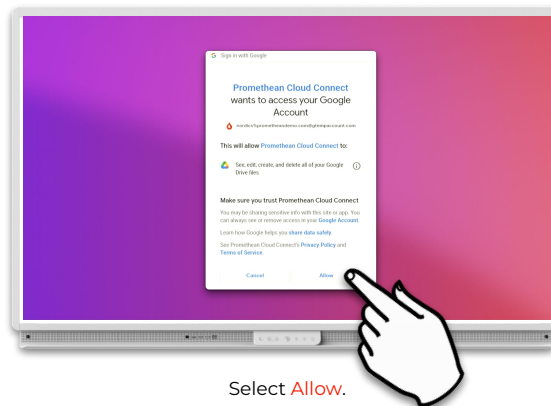

Sign in, select your **profile icon** in the bottom left corner and then select **Account**.

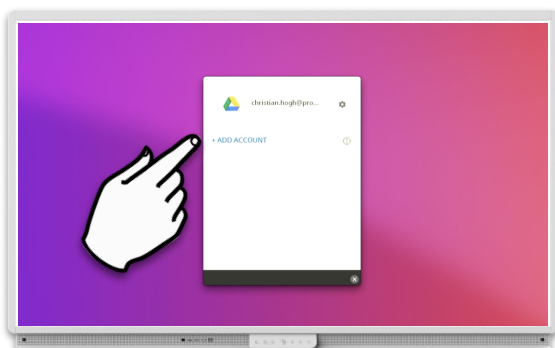

Select **Cloud Drives** and then the service you want to connect (**Google / Microsoft**).

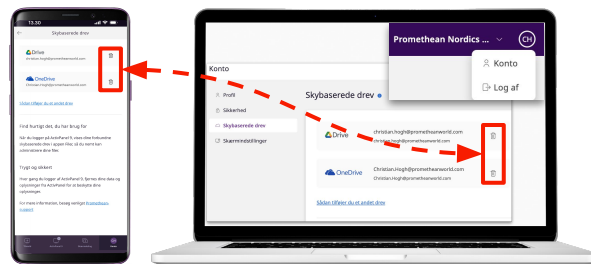

A browser window opens. Enter the **login details** for your cloud account and press **Next**.

Select **Allow**.

You can add more cloud-based services by selecting **Add Account**.

You can remove the connection to your cloud-based services at any time, from your **Promethean account**.
