

CONNECT TO A NETWORK

Learn how to connect your ActivPanel to a network.

NOTE: If your ActivPanel is already connected to a wired network, no further action is required of you.

Open **Menu, Applications** and select **Settings**.

Select **Network & Internet**.

Make sure that **Wi-Fi** is on **(A)** and press **Wi-Fi (B)** to select a **wireless network**.

Select your **wireless network** from the list.

Enter the network **password** and - if needed - adjust **advanced options**. Then select **Connect**.

Once a connection is made, you'll see the status **"Connected"** under the network name.
