

CONNECTING DEVICES TO SCREEN SHARE

Learn how to connect student devices wirelessly to your ActivPanel, using Screen Share.

Connect student devices using AirPlay or WiFi-Direct technology, or by using the Promethean/Screen Share App. For more information, go to: <https://share.one.prometheanworld.com>.

Windows PC

Download the [Screen Share app](#) and connect using the Panel ID.

Or...

If your device supports WiFi-Direct, press Windows+K buttons simultaneously and select your ActivPanel from the list.

Macbook

Download the [Screen Share app](#) and connect using the Panel ID.

Or...

If your network is set up for AirPlay, go to the Screen Mirroring menu and select your ActivPanel from the list.

IOS / Android

Download the [Promethean app](#) from the [App Store](#) or [Google Play](#). Connect using the Panel ID.

Chromebook

Download the [Screen Share Chrome extension](#).

From the Chrome browser, open the extension and connect using the Panel ID.
