

EXPLAIN EVERYTHING: ADD PHOTO, VIDEO OR FILES

Learn how to add a Photo, Video or other File to your canvas

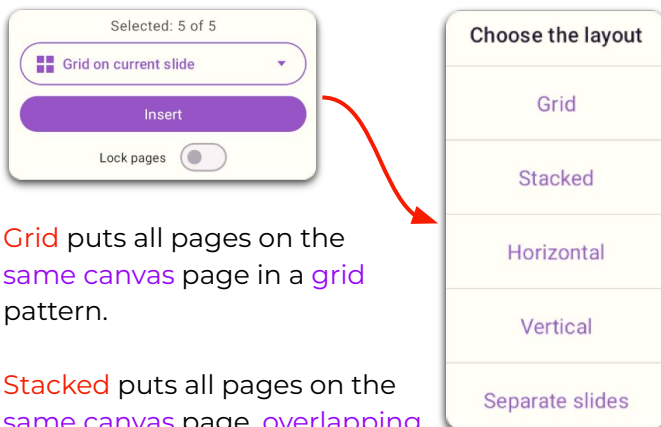

Add Photo, Video or File

Explain Everything lets you easily add a wide range of media and files to the canvas, using the **Add Media**  button.

Add a **file** including images, videos, pdf and Microsoft Office files (.xls / .doc / .ppt) to the canvas.

If your file/document contains multiple pages, you will be prompted to choose which ones to import, and how to present them in your project:

Grid puts all pages on the **same canvas** page in a **grid** pattern.

Stacked puts all pages on the **same canvas** page, **overlapping**.

Horizontal and **Vertical** puts all pages on the **same canvas** page in a single **row** or **column**.

Separate slides will import each document page to a **separate canvas** page in your project.

You can also choose **Lock pages**, fixing them in place on the canvas.
