

MATH TOOLS

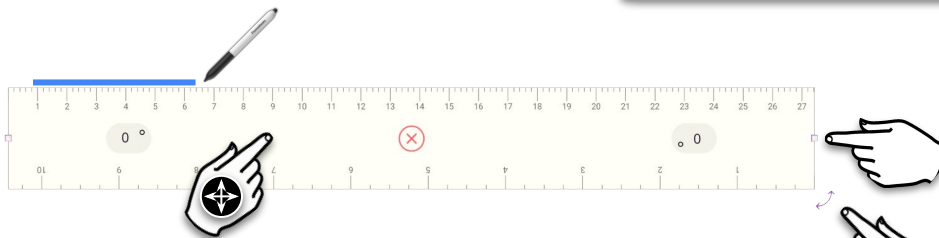

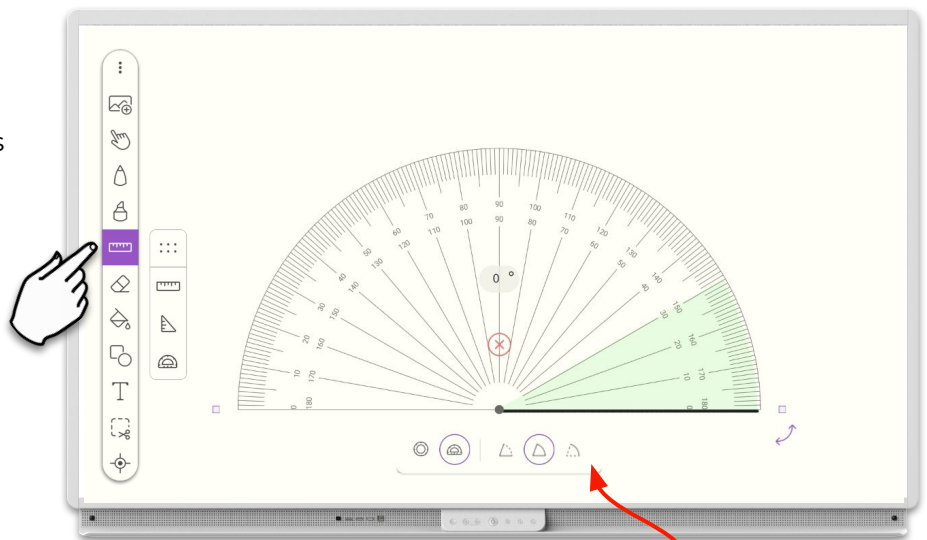

Learn how to use the math tools in Explain Everything.

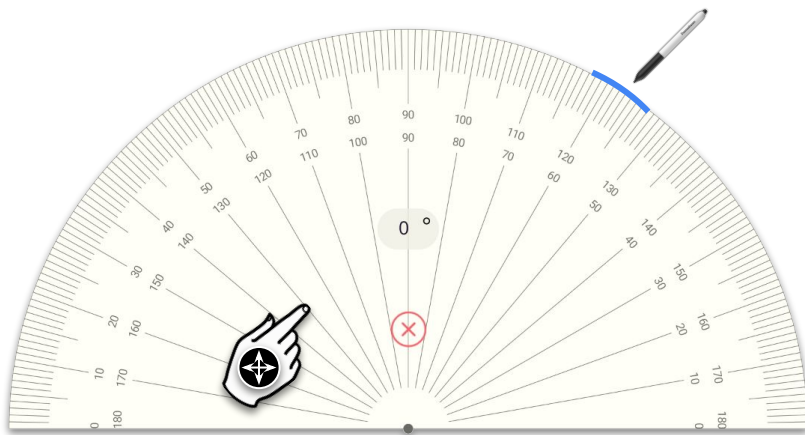

Math tools

Explain Everything's **math tools** are great for everything from straight lines to geometric construction. Operate them with either one or two fingers.

You can freely **move**, **rotate** and **resize** the tools. When using one finger, the outcome depends on the area you press and drag as shown below.

More **tool settings**

-  Drag here to **move**.
-  Drag here to **resize**.
-  Drag here to **rotate**.
-  Select to **close** the tool.
-  Draw with the **pen** along the edge.
