

PEN & TOUCH DIFFERENTIATION

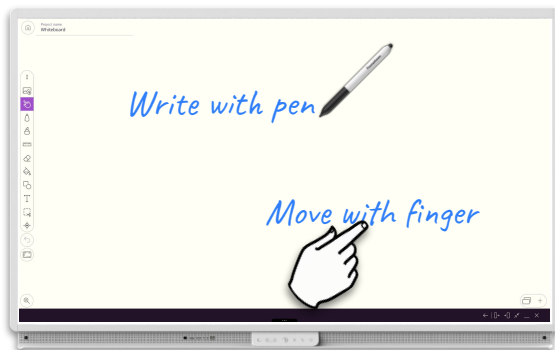

Learn how to use touch gestures to save time, when using the Explain everything app.

Touch differentiation

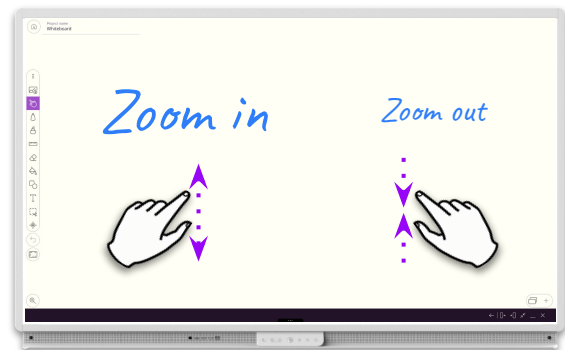

Promethean Vellum™ Touch technology creates an intuitive experience that saves time when using the Explain Everything app on your ActivPanel.

with the **Hand** tool selected  you can use write, move, zoom and erase etc. without changing tools.

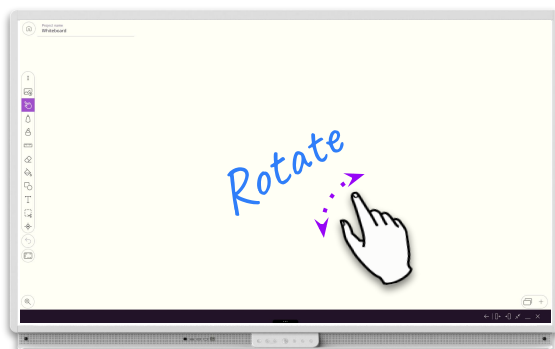

Write with the **pen** and **move** objects or the whiteboard area with your **finger**.

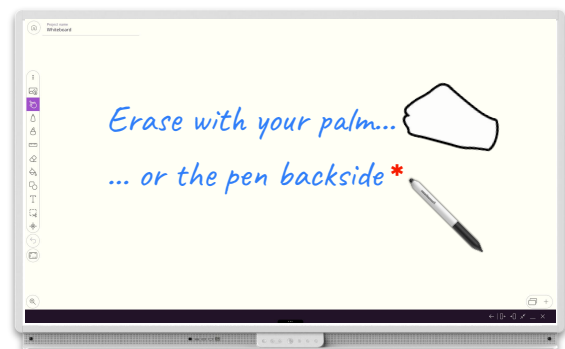

NOTE: If you want to write with your finger, you can choose the **Pen** tool from the menu.

Use **two fingers** to **zoom in** or **out**, either on **objects** or the **entire whiteboard**.

Use **two fingers** to rotate objects.

Erase newest annotations with your **palm**, or use the pen **backside** to **fine erase** (*Premium only).

The **Pen** will always **annotate**, even when other tools are selected.
