

# INTRODUCTION TO SPINNER

Learn how to use the Spinner app to create lists and randomize selections.

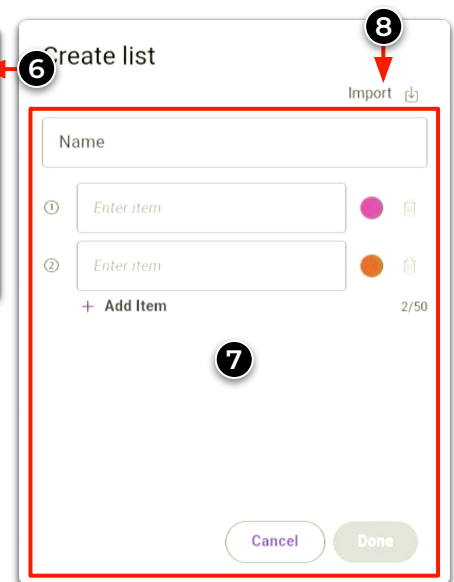

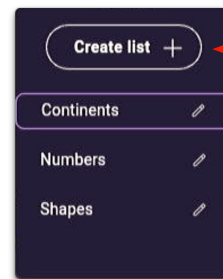

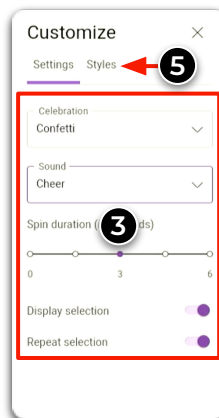

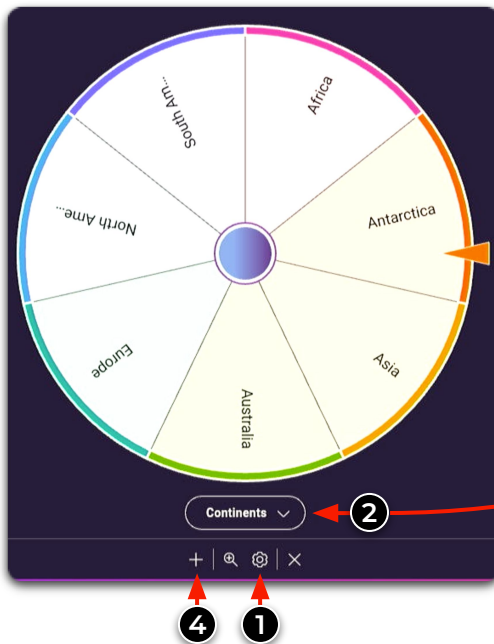

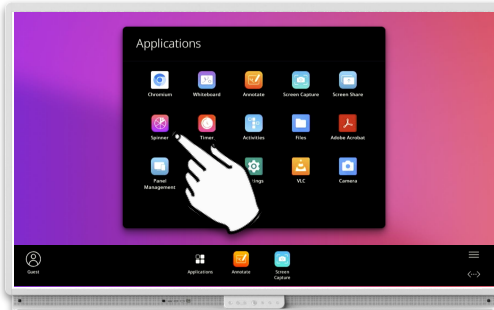

## Spinner

Open the **Applications** locker from the **Menu** and select **Spinner**. If you use this tool often, you can drag the icon from the **Applications** locker onto the **Menu**, to create a shortcut.

A web version of the app is also available, from the **OnePromethean** website.

- 1 Select the **Cog** to display the **Spinner** settings.
- 2 Select the **dropdown** to choose an **existing** or **create a list**.
- 3 Adjust **Spinner** settings.
- 4 Tap the **plus icon** to open another spinner on the screen. You can have up to 4 timers at the same time.
- 5 Select **Styles** to change the **color scheme** of your Spinner.

- 6 Select **Create list** to open the **list creation box**.
- 7 Enter **name** and **list items** and select **Done** to save your list.
- 8 **Import list** from a **USB-drive** (.csv file format).

If you're signed in with your **Promethean** account, your lists and settings will be saved to your profile.
