

# MENU & APPLICATIONS

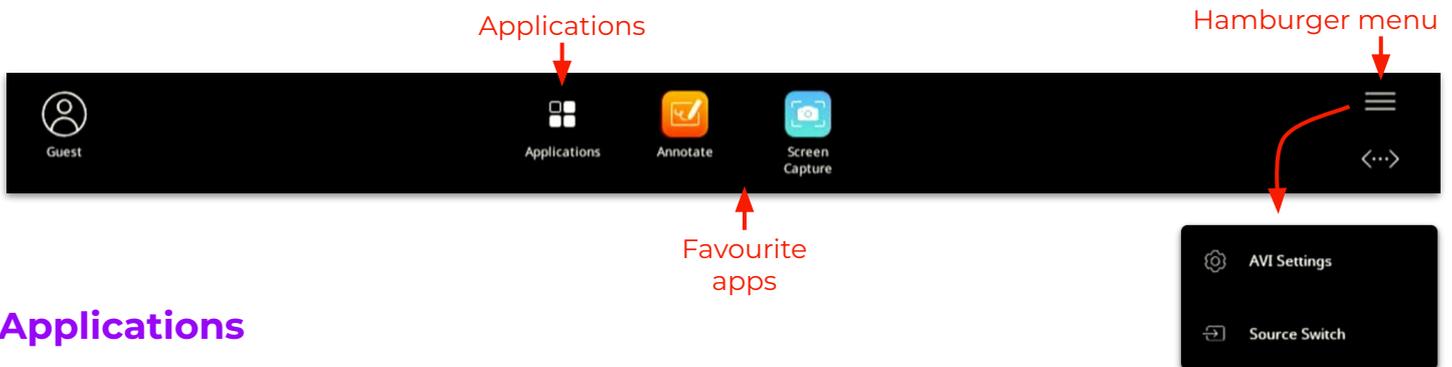

Learn how to access the menu and applications on your ActivPanel.

## Menu

Press the **flame** button on the ActivPanel's **center console** or **remote** to open the menu.

The menu gives you access to **applications**, as well as **shortcuts** to your **favorite apps**.

You can also change the **source** or access the display's **AVI settings** from the **hamburger button**.

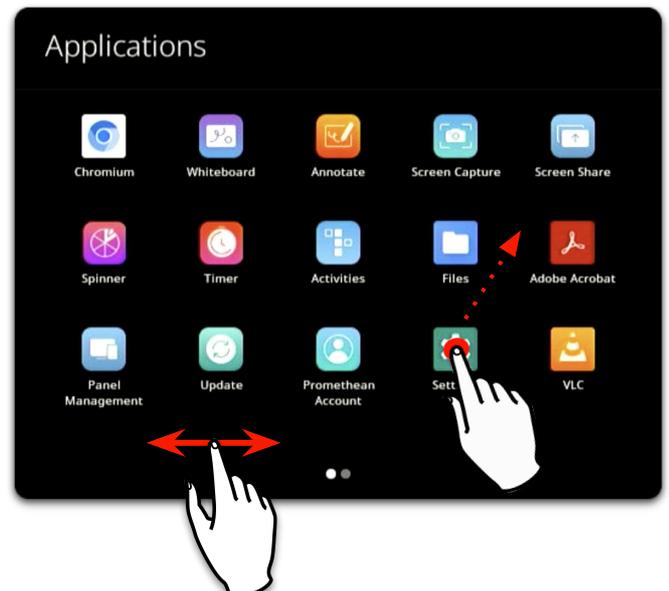

## Applications

Applications lets you quickly access your ActivPanel's pre-installed classroom essential apps, as well as any apps installed by your IT-admin.

Navigate and reorganize the apps, exactly as you would on a Smartphone:

- **Swipe** left/right to browse pages.
- **Press and hold** to drag an app to a new position or page.

 If you are logged in to your Promethean account, your applications layout and settings will synchronize to your profile.
