

PANEL SETTINGS

Learn how to quickly access and adjust panel settings for sound, image and interaction.

The ActivPanel provides quick access to **audio**, **visual** og **interaction** settings, directly from the menu.

Open the menu (Flame button) and select the **hamburger menu**.

Select **AVI-settings** and use the sub-menus on the bottom, to switch between **visual**, **audio** and **interaction** settings.

Visual

Adjust **backlight** and **reduce bluelight**.

Audio

Adjust **volume**, **treble**, **mid tone**, **bass** and **stereo balance**.

Interaction

Set preferred **palm mode** and **pen thick end mode**.

Scroll down to see advanced audio settings.

This includes the option to switch between any attached external speakers or microphones etc.

You can also enable/disable the panel speakers to play alongside external speakers - e.g. for tele loop setups.
