

WIRELESS MIRRORING WITH SCREEN SHARE

Learn how to use the Screen Share app, and mirror device content wirelessly to the ActivPanel.

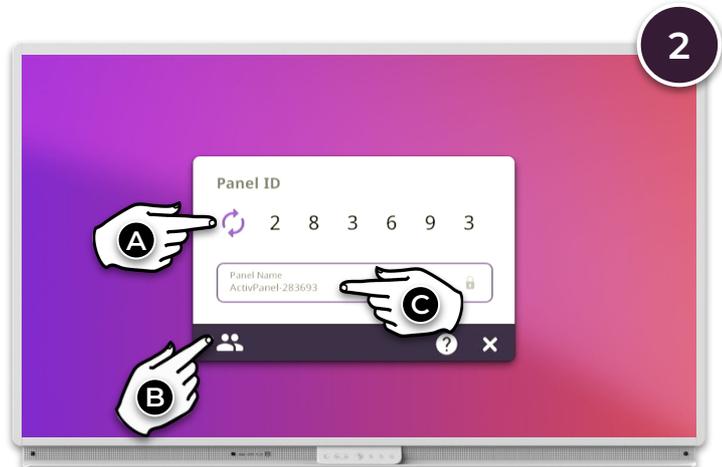

Screen Share

The Screen Share app lets you wirelessly mirror content from any type of device, including [Smartphones](#), [Tablets](#), [Chromebooks](#), [Windows-](#) and [Mac OS](#) laptops.

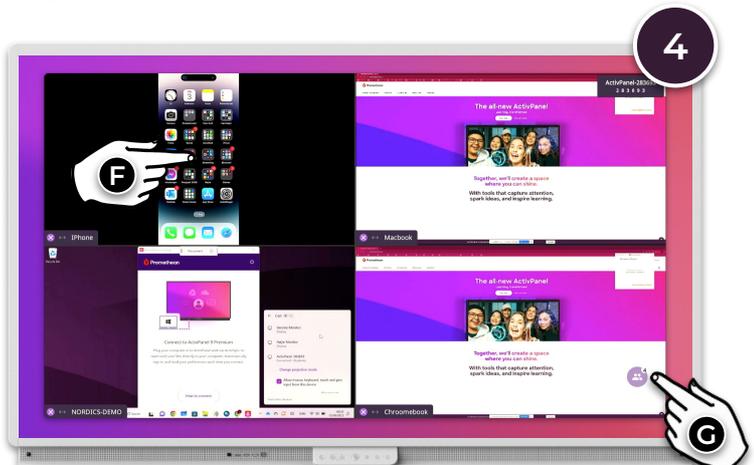

From the **Menu**, open the **Applications Locker** and select **Screen Share**.

- A** Change the **Panel ID** (Code used by devices to connect)
- B** Change the **Panel Name** (e.g. room number or class name)
- C** Go to the **Lobby** (Full Screen)

- D** From the **Lobby**, choose up to **4 devices** to show **simultaneously**.
- E** ... and select **Share**.

- F** Click any of the **device streams**, to enter **fullscreen**.
- G** ... or select the **Lobby** button to return to the **Lobby**.
