

STORE USER DATA & PASSWORDS LOCALLY

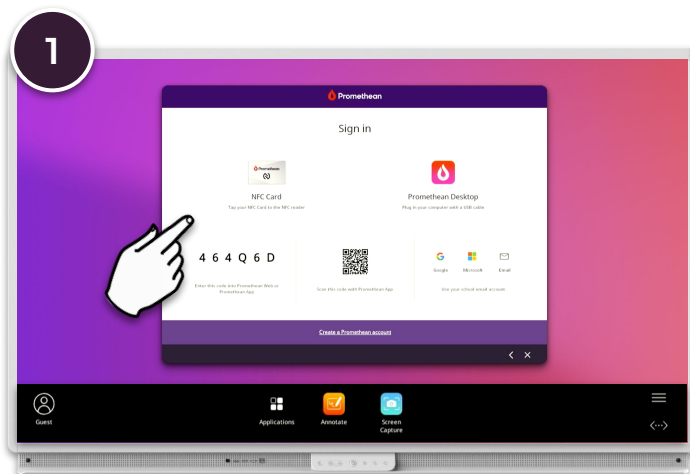

Learn how to store your login details etc. for websites locally on your ActivPanel.

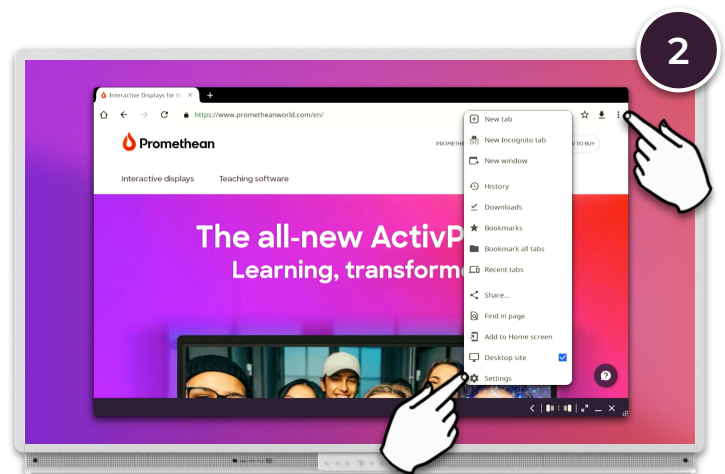

Local data retention

When signed in on ActivPanel with your [Promethean account](#), you are able to store user data such as login and passwords, Chromium shortcuts etc. This saves valuable time when accessing websites and services, requiring you to log in.

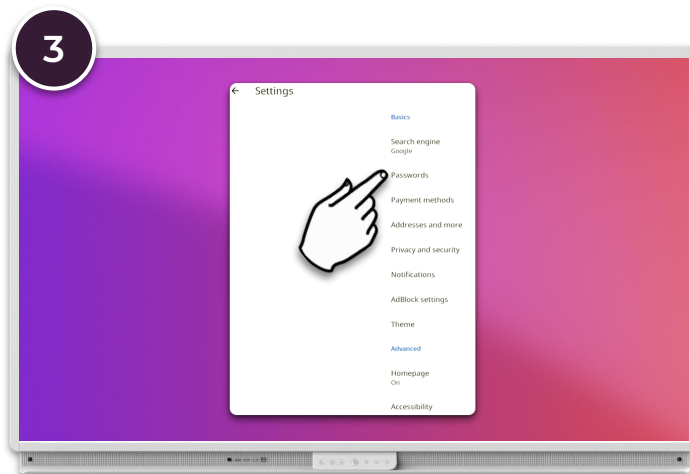

Data is encrypted and stored locally on the panel, and only available when signed in with your [Promethean account](#). No data is transferred to or stored externally.

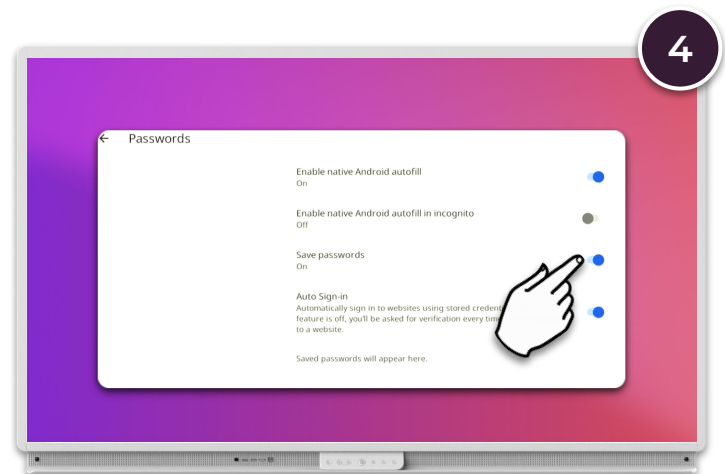

Sign in on the ActivPanel with your [Promethean Account](#).

From the [Chromium browser](#), select the [Kebab menu](#) and then [Settings](#).

Select [Passwords](#).

Set [Save passwords](#) to "On".

You can also toggle settings for auto-filling and automatic sign-in for websites, at your convenience.
