# Promethean

TOUCHBACK

Learn how to enable touchback to control touch on Windows & Mac devices through Screen Share.
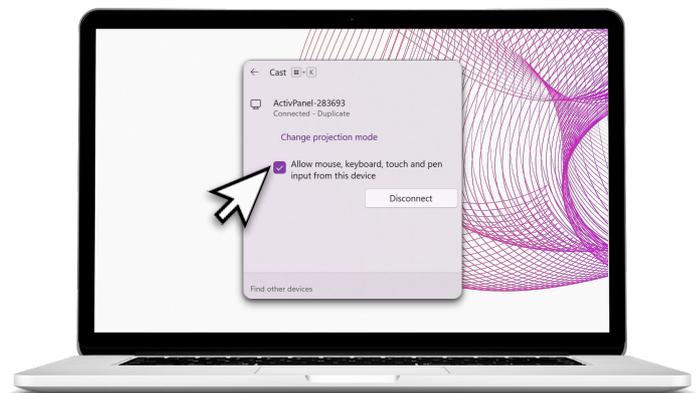

Touchback

The Promethean **Screen Share app** supports touchback on connected Windows and Mac devices, allowing you to navigate and interact with these devices directly from the ActivPanel in real time.

Screen Share App

**WiFi-Direct**

When using the Promethean **Screen Share app**, click the Enable touchback option to toggle touchback on/off for your device.

When connecting with WiFi-direct, click the Allow mouse, keyboard, touch and pen input from this device to toggle touchback on/off for your device.

In the Waiting Room, a purple dot 🟣 next to the device name denotes that touchback is enabled.

When mirrored, the device screen is also framed in green.
