

USING THE REMOTE

Learn how to use the remote to control your ActivPanel.

Remote

With the remote, you can easily navigate the tools on your ActivPanel from anywhere in the classroom.

- Use the **power** button to turn on your ActivPanel.
- Press the Promethean **flame** button to access the main menu.
- Use the **arrows** to navigate to the option of your choice and the circle to select your object.
- Use the **back** button to return to the previous screen.
- Select the **freeze** button to freeze the current image on your screen from a connected device.
- Use the **volume** buttons to increase or decrease the volume of your ActivPanel's sound.
- Use the **source** button to switch between connected devices.
- Select the **touch** button to turn touch function on or off.
- Use the **panel settings** button to adjust the audio, visual and interaction settings of your ActivPanel.

 If you open a PowerPoint or Google Slides presentation in the Chromium browser, you can use the remote to navigate your slides and advance the presentation.
