

How to Use the Infinite Canvas in the Promethean Whiteboard App

The Promethean Whiteboard app provides you with an Infinite Canvas, so your lesson can be as organic and wide-ranging as you wish.

With the **Selector Tool** in use, simply **pinch and zoom** to resize, or **drag** to move to a new part of your canvas.

The Radar Window in the top right corner serves as a guide to show you the canvas's contents.

You may always select the **Menu**, then **Export PDF Canvas** to export your entire canvas to a PDF.
