

How to Export in the Promethean Whiteboard App

The Promethean Whiteboard app makes it easy to export your whiteboard sessions to save and share with others.

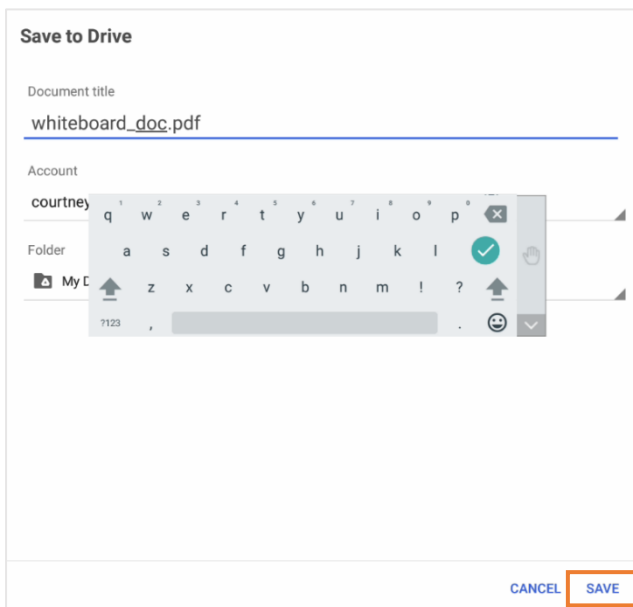

Select the **Menu** button at the top of the toolbar and choose between **Export PDF Screenshot**, which will capture the current screen, or **Export PDF Canvas**, which will capture your entire whiteboard canvas.

Choose where you would like the file to be saved. You may select your connected Google Drive, the device itself, or any other application you have installed.

Note: To learn how to install applications, please visit our [Learn Promethean website](#) for helpful resources.

Once you have chosen a location, title your file using the keyboard. Tap **Save** to complete the export.
