

## How to Publish Resources to the ClassFlow Marketplace

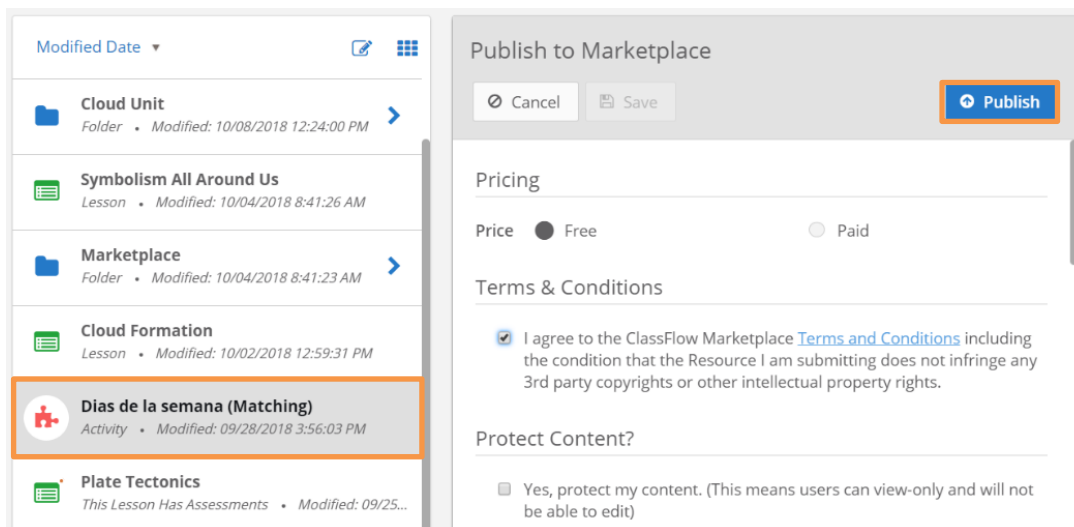

We encourage you to publish resources you've created to the ClassFlow Marketplace so other educators may benefit from using them too.

Begin at the **Resources** tab. Select the **resource**, then locate the **Publish** button to the right. It resembles a shopping cart.

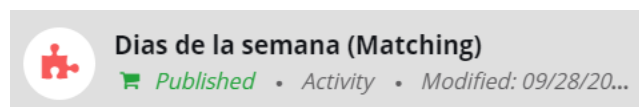

Determine your pricing preference and agree to ClassFlow Marketplace's Terms and Conditions. Decide whether you would like to protect your content as well.

If you have not yet added properties to your resource, please input them now. The fields with asterisks are required. Properties help users search for resources that best fit their students' needs.

Finally, click the blue **Publish** button. You will receive a confirmation notice that your resource will be published soon.

Published resources are denoted by a green shopping cart and labeled *Published* within your Resources.

Manage your published resources by selecting your avatar or initials in the top right, then click **My Account**. Expand the **Marketplace** dropdown menu on the left for more options.
