

How to Add Assessment Questions to a ClassFlow Lesson

In ClassFlow, you can add assessment questions directly into your lessons, providing you with formative data and saving you valuable time.

In Lesson Builder, select the **card** you wish to add assessment questions to and click the **Assessment** button from the toolbar. Assessment Builder will open.

The question type defaults to **Multiple Choice**, but you may select from 12 question types by expanding the dropdown menu.

The data you need to input depends on the question type. Be sure to select or indicate the correct answers for objective questions. You may also add images and passages of text.

Use the **+Question** button to add new questions. Use the **Import** button to import items from other ClassFlow resources containing assessment questions.

Select **Assessment Summary** for an overview of all assessment questions within your lesson. Each Question Set refers to a card within your lesson.

To exit, click the **ClassFlow Menu** button, then **Exit Builder**.

 **Plate Tectonics**
This Lesson Has Assessments

Cards containing assessment questions will be denoted with an orange icon and the number of questions in Lesson Builder. Lessons containing assessment questions will be denoted with an orange dot and labeled "This Lesson Has Assessments" within your Resources.
