

How to Access Delivered Assignments in ClassFlow

To access your delivered assignments in ClassFlow, start on the **Classes** page.

View recently delivered assignments from the My Feed section or your Class Feed, or by expanding the **Class menu** and selecting **Delivered Assignments**.

Select the assignment you wish to see in more detail. Score and review student submissions, edit the assignment properties, export assignment results to a .CSV file, or delete the assignment entirely.

Best of all, ClassFlow assignments allow you to view which students have submitted an assignment, are in progress, or have not yet started.
