

How to View ClassFlow Assessment Results in Lesson Presenter

ClassFlow allows you to view assessment results in real time, providing you with valuable formative data and allowing you to intervene with students in the moment.

While delivering an assessment in Lesson Presenter, select the **View Assessment Results** button on the Teacher Panel.

Results will be anonymous by default, but you may always show students' names by selecting **Show Names**. View assessment data by student, question, or a specific response. Click the **X** to return to the lesson at any time.

After you stop an assessment, access the data from the **Classes** page. You may score subjective questions and download data to a .CSV file.
