

How to Use My Feed in ClassFlow

Located under the **Classes** tab, My Feed is a record of all lessons, activities, assessments, assignments, and polls you have delivered to all class sessions, including via Open Class.

If you have Student Generated classes, My Feed will also display posts you have created for your classes and posts created by your students. This is ideal for communication and collaboration with students or even to support a flipped classroom.

To create a class post, enter text. Click the **paper clip** to attach ClassFlow resources such as lessons and activities, or the **arrow** to upload files from your device.

Select a recipient. You can post to individuals, groups of students, entire classes, and multiple classes. Only classes will be visible within the dropdown, but simply begin typing a student's or group's name to locate. When ready, click **Post**.

Select any rostered **class title** to isolate a Class Feed, which displays all information from My Feed pertaining to a class.
