

How to Convert Existing Resources in ClassFlow

ClassFlow allows you to convert your existing ActivInspire flipcharts, SMART Notebook files, PDFs, and PowerPoints into ClassFlow lessons, allowing you to utilize ClassFlow features such as sending cards and polling without having to reinvent materials you already love to use with your students.

From the **Resources** tab, select **+New**, then **File Upload**.

You'll be prompted to find the file on your device. Note: You may convert files that are less than 100 megabytes in size. Once you have selected your file, click **Open**. Your original file will not be affected or changed in any way.

From the Convert to Lesson window, select **Continue**, and you will then see an Upload window showing the status of your conversion. Depending on the size of your file, it may take a moment.

Once the conversion is complete, you will see the new ClassFlow lesson listed within your Resources. Feel free to modify or deliver as with any other ClassFlow lesson.
