## CREATING A CLASSFLOW ACCOUNT

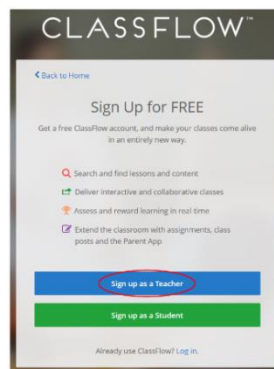

1. On your device, launch your internet browser and type in the following URL:  
<https://classflow.com>.

Note: ClassFlow works best with Google Chrome, Internet Explorer, and Safari.

2. Select **Create an Account**. Note: You may utilize your existing Google, Microsoft, or Facebook accounts by selecting **Log In**.

3. Select **Sign up as a Teacher**.

4. Fill in all fields, including Terms of Service, and select the **Sign Up** button.

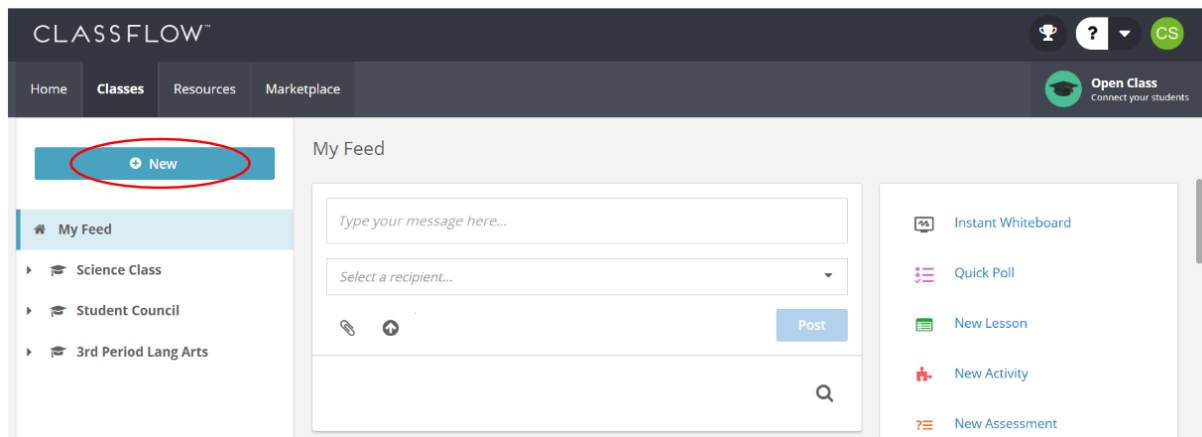

A screenshot of the 'Sign up as a Teacher' registration form. It includes fields for 'Create User Name', 'First Name', 'Last Name', 'Email Address', and 'Password'. Below these are checkboxes for 'Yes, I would like to receive emails with helpful information and resources to improve my ClassFlow experience.' and 'I have read and agree to the Terms and Conditions, Privacy Policy and Cookie Policy'. A 'I'm not a robot' checkbox and a CAPTCHA image are also present. At the bottom, there's a 'Sign Up' button and a link for 'Already Registered? Please Log In to your ClassFlow!'. The 'All fields are required' text is circled in red.

## ADDING A CLASS

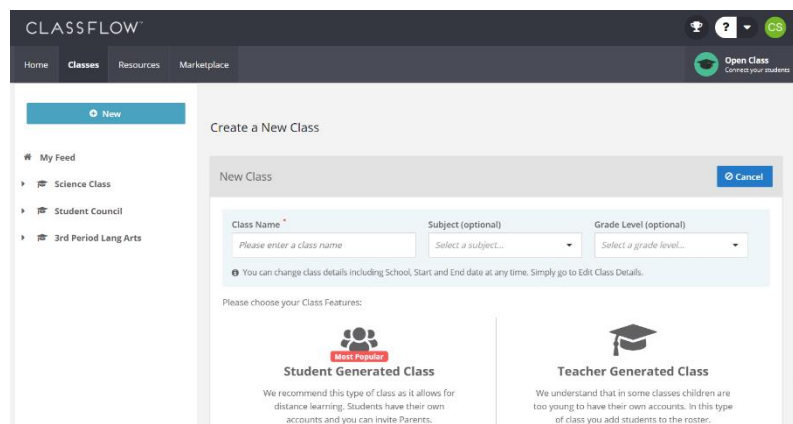

1. Once you log in, select **Classes**.

2. Select **+New**, then **Add a Class**.

3. Type in the **Class Name**, **Subject** and **Grade Level**. Then select **Choose and Create**. See below for directions on how to add students for each option.

## ADDING STUDENTS

### Student Generated Class

1. Between the two class types, select **Student Generated Class**.

Most Popular

#### Student Generated Class

We recommend this type of class as it allows for distance learning. Students have their own accounts and you can invite Parents.

Choose and Create

-  Share Content
-  Assignments
-  Student Accounts
-  Assessments
-  Results History
-  Award Badges

2. To add students who do not already have ClassFlow accounts: Ask your students to register for accounts by visiting <https://classflow.com> and selecting **Sign Up as a Student**. They will then enter the Class Code for your class and their credentials.

Note: You may wish to advise your students of any naming or password protocols you have.

3. Adding students that already have ClassFlow accounts: Students can add themselves using your Class Code. Ask students to log in to their accounts and enter your Class Code, then select **Enroll** from the options on the drop-down menu.

Note: Selecting **Join** will only temporarily add them to your class session.

## ADDING STUDENTS

### Teacher Generated Class

1. Between the two class types, select **Teacher Generated Class**.

#### Teacher Generated Class

We understand that in some classes children are too young to have their own accounts. In this type of class you add students to the roster.

Choose and Create

 Share Content

 Assignments

 Student Accounts

 Assessments

 Results History

 Award Badges

Note: If you select this option, you will manually enter students' names and they will only have the above referenced capabilities.

2. Select **Add Students**.

Add your students and enable interactive lesson features

 Add Students

3. Input the student’s first name and last name and select **Save** when finished.

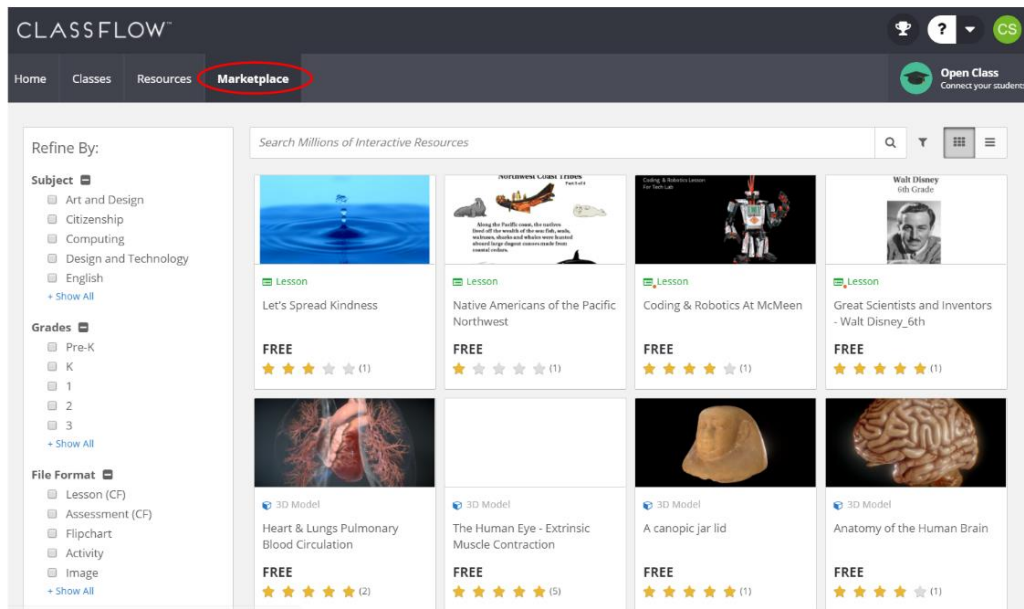

Add Students

CancelSave

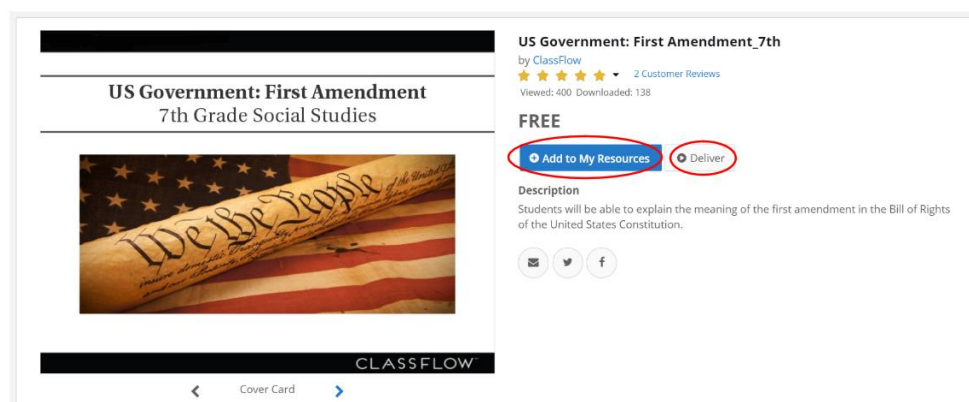

First Name	Last Name

## FINDING READY-MADE CONTENT Marketplace

1. To find ready-made content, select **Marketplace**.

2. Search by Subject, Grades, File Format, and more. You may also search by keyword in the search bar, or by standards when selecting the funnel icon.
3. Once you have found a resource you would like to use, you may either select **Add to My Resources** for later and/or continued use, or **Deliver** it directly to your class.

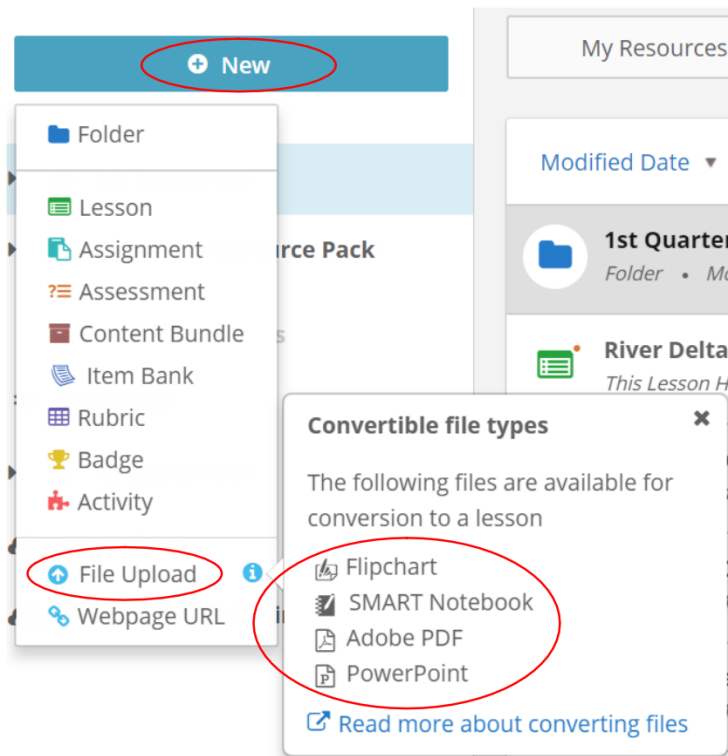

4. You may publish your own resources to the Marketplace as well.

## IMPORTING EXISTING CONTENT Resources

1. To upload content that you may already have (ActivInspire Flipcharts, SMART Notebooks, PDFs, and PowerPoints), select **Resources**.

2. Next, select **+New**, then **File Upload**.

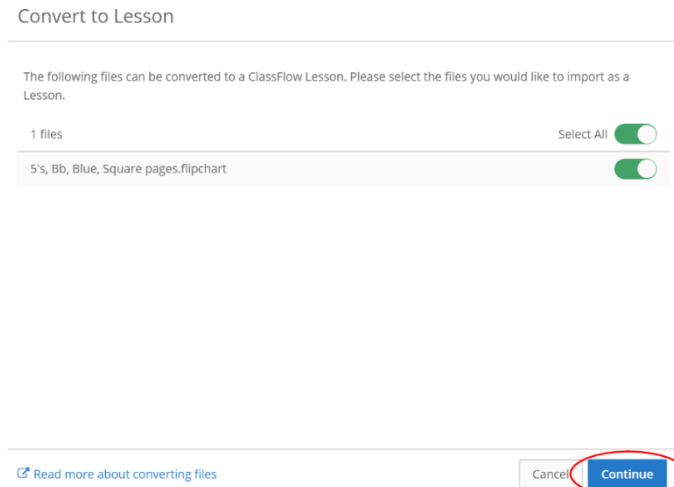

3. You will be prompted to find the file on your computer. Select **Open**.

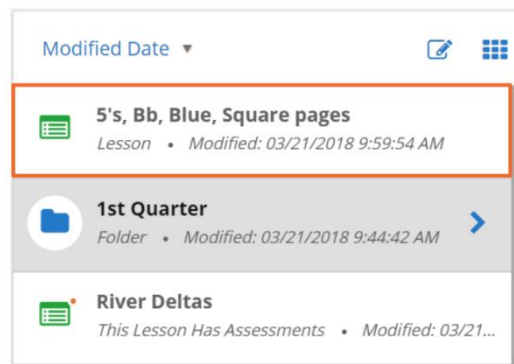

- Once you have chosen the file, select **Continue**.

- You will see a window showing your resource being converted into a new ClassFlow lesson. This sometimes takes a moment.

- Once your lesson is successfully uploaded, you can close the message box.
- Your file, converted to a ClassFlow lesson, is now listed within your Resources.

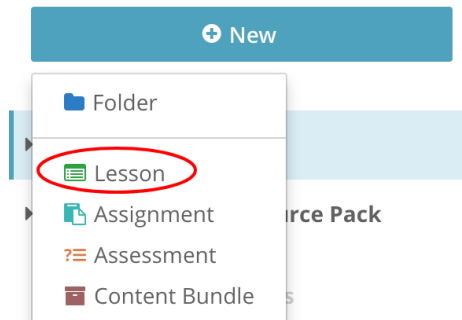

8. Select the newly converted ClassFlow lesson. You will see several options appear on the right-hand side of your screen. You may choose to **Edit Lesson**, or **Deliver** to your class.

## CREATING A NEW LESSON

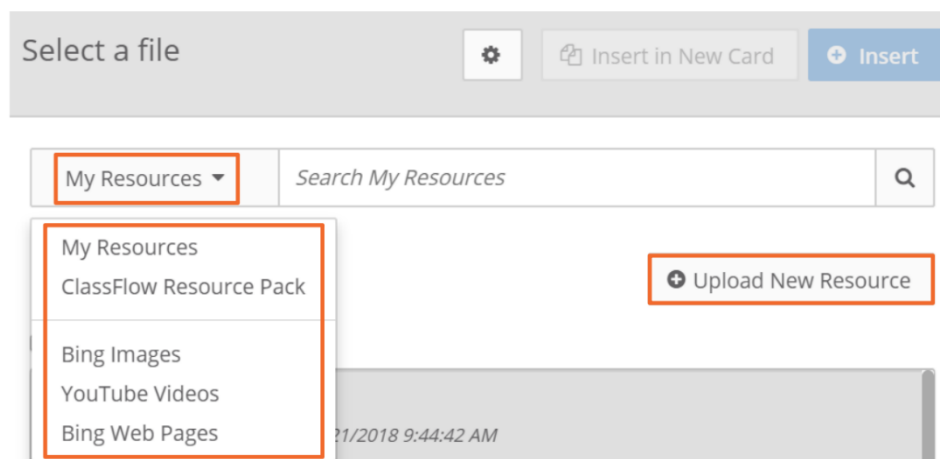

1. To create a new lesson in ClassFlow, simply navigate back to **Resources**, and select **+New**. Choose the second option from the drop-down menu, **Lesson**.

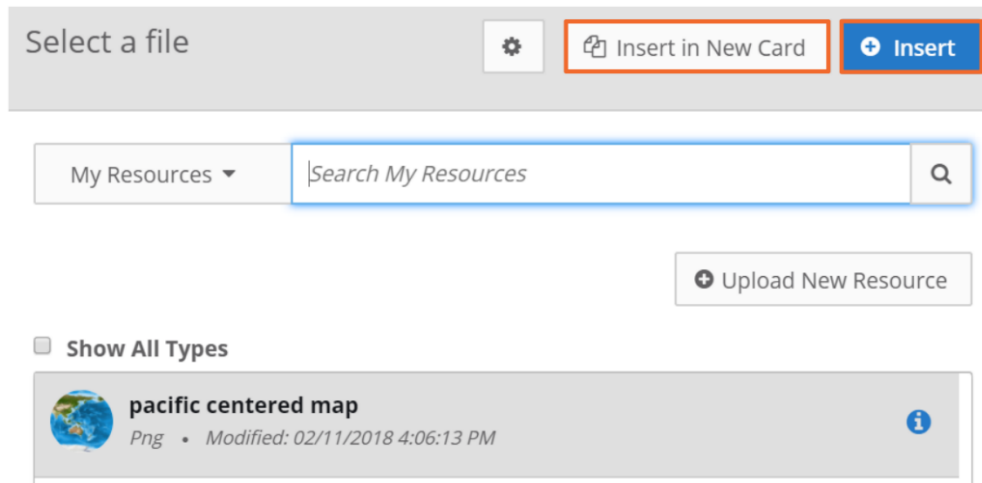

2. You may now use any of the tools across the top of your screen to begin building your lesson.

3. To insert items from your Resources such as images or video files, select the **Insert** icon.
4. Though the default option is to insert files from your **Resources**, you may also select from the **ClassFlow Resource Pack**, search **Bing Images**, **YouTube Videos**, and **Bing Web Pages**. Selecting **Upload New Resource** allows you to choose additional files from your device.

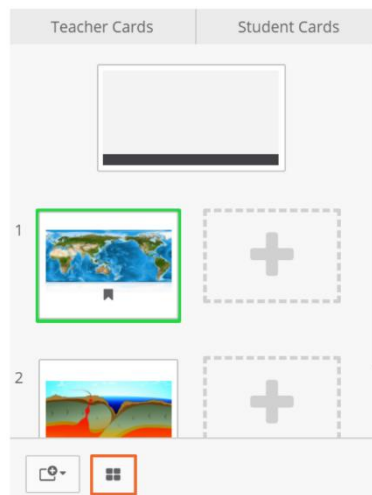

- Once you have selected the resource to add to your lesson, you can choose to either **Insert in New Card**, or **Insert** onto the current card.

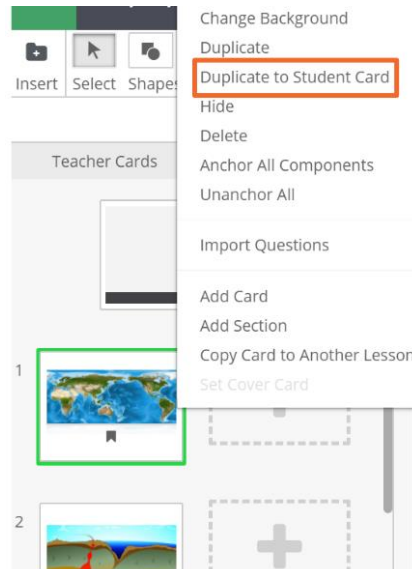

- To add a blank card to your lesson, simply select the plus icon in the lower left-hand corner of your screen. Choose **Add Card**.

- To add a student card to your lesson, select the icon in the lower left-hand corner of your screen with four squares. This opens your Student Track.

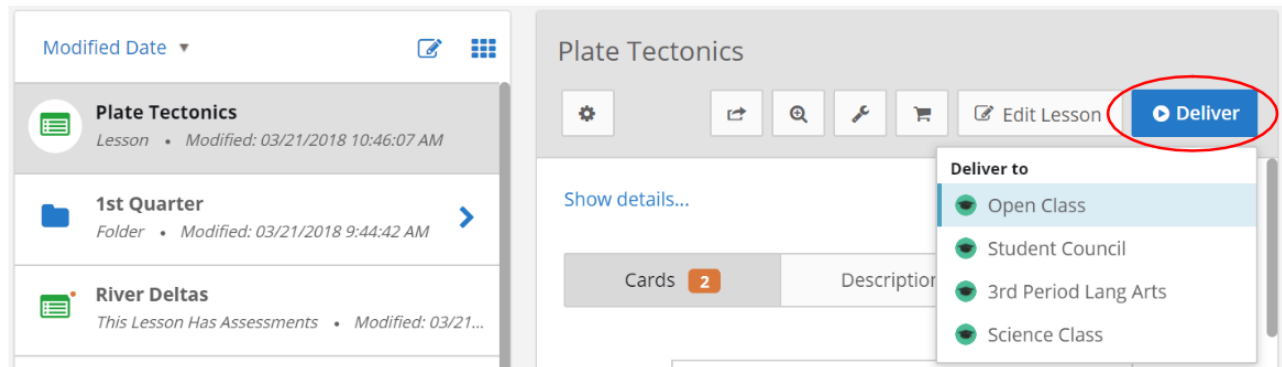

8. You can click the plus sign in the student card area to create a unique student card. To duplicate the teacher card to the student track, select the cog on the teacher card. Choose **Duplicate to Student Card** from the menu.

9. To close the student track, simply click the icon with four squares again.

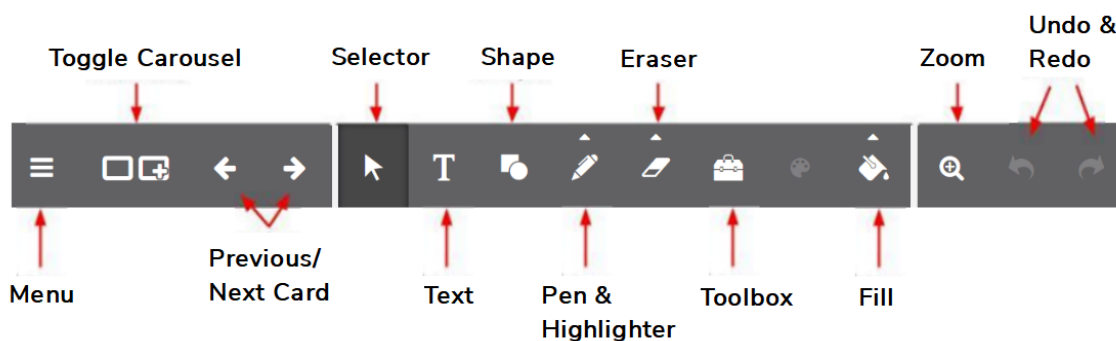

## DELIVERING A LESSON

1. To deliver a lesson, go to **Resources**.
2. Select the lesson you would like to deliver.
3. Upon selecting **Deliver**, choose the class you would like to deliver to from the drop-down menu.

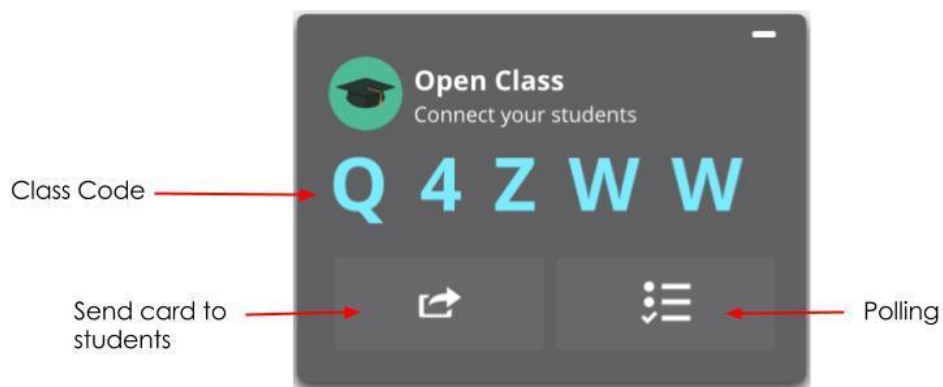

Note: Once you have started the delivery of a lesson to a class, your students are able to join your live class session. They may join either via URL (Open Class), code (Teacher Generated Class), or by logging into their ClassFlow accounts, choosing your class name from the homepage and selecting the **Join Class** button on the right-hand side of their screen (Student Generated Class).

4. You can now control your lesson using the main toolbar at the bottom of your screen.

5. Once students are connected, you may send them student cards, teacher cards, and deliver formative assessments via polling.

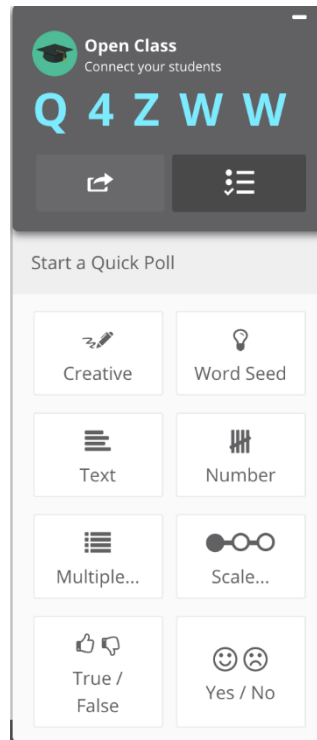

## POLLING STUDENTS

1. When you are delivering a lesson and you have students connected, you may poll them by selecting the polling icon on the Teacher Panel.

Note: You need at least one student connected in order for this icon to be viable.

2. You have eight different polling options.

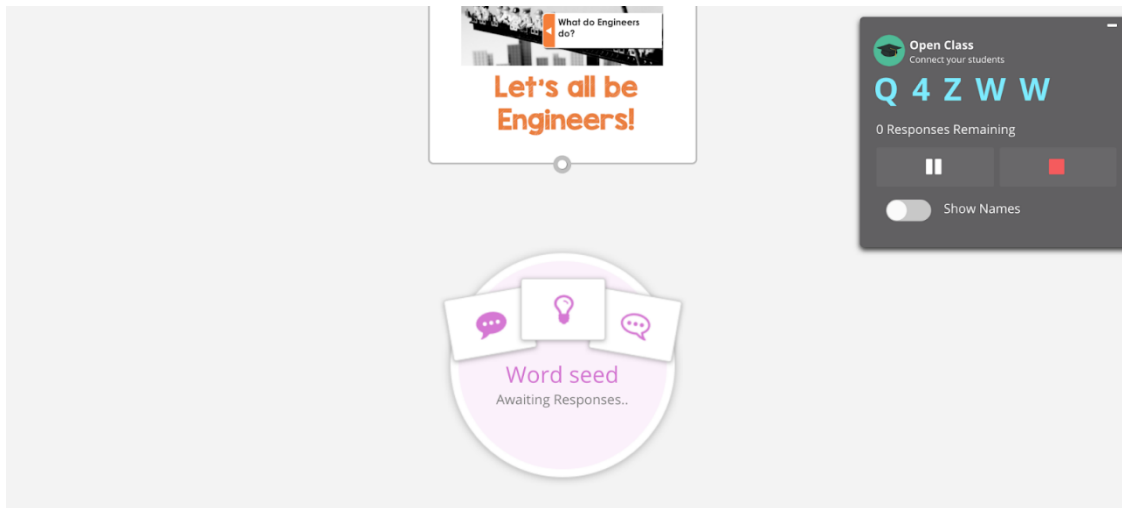

3. Select the poll type you would like.
4. Once you begin a poll, you will have the option to stop or pause the poll from the Teacher Panel in the right-hand corner.

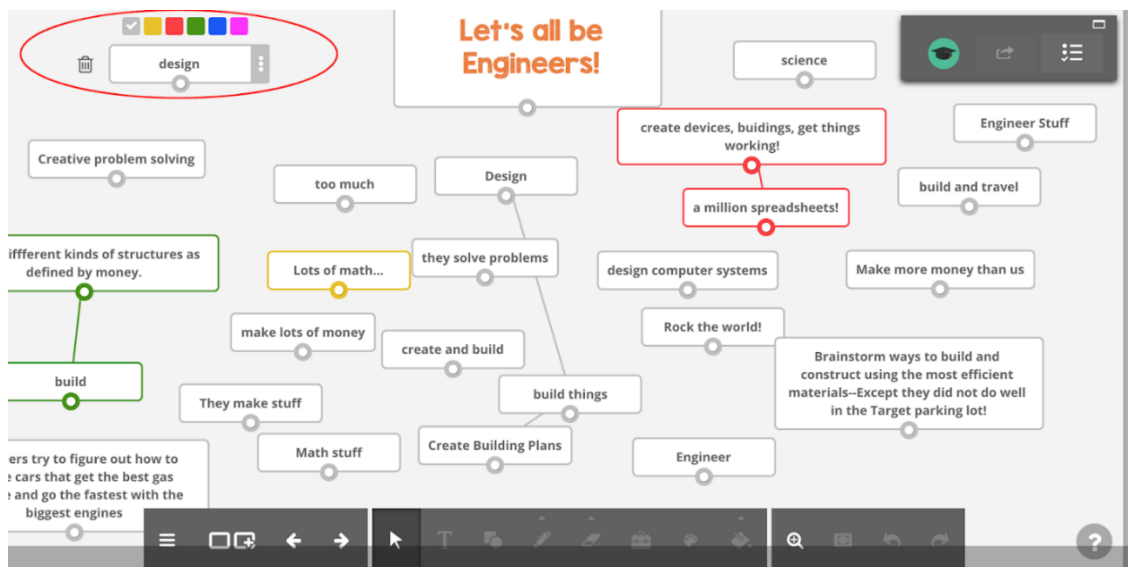

- Student responses populate on the newly-formed results card that appears on your screen. Depending on the poll, student responses will either populate as individual boxes, or as a bar graph. Responses populate anonymously until the **Show Names** toggle is switched on.

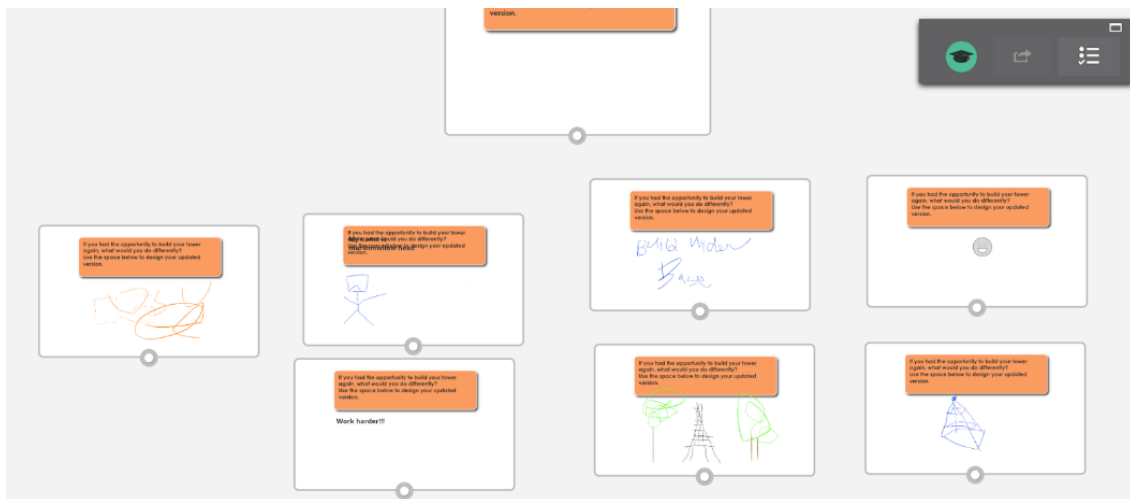

- For word seed, text, or number polls, the responses will look like the image below. You can move each student response by dragging, and connect responses using the circles on each box. When you select a student response, you have the option to delete the response, change the color of the box, or start an additional poll from there.

- For multiple choice, true/false, scale, and yes/no polls, the responses will populate in a bar graph.

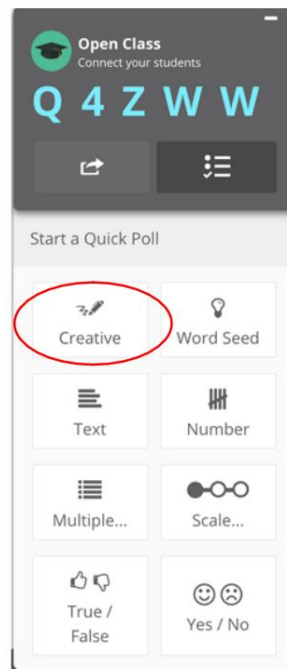

- Creative response polls allow students to utilize a toolbar to add text, pictures, shapes, and pen annotations before submitting their responses. (See next section for more information.)

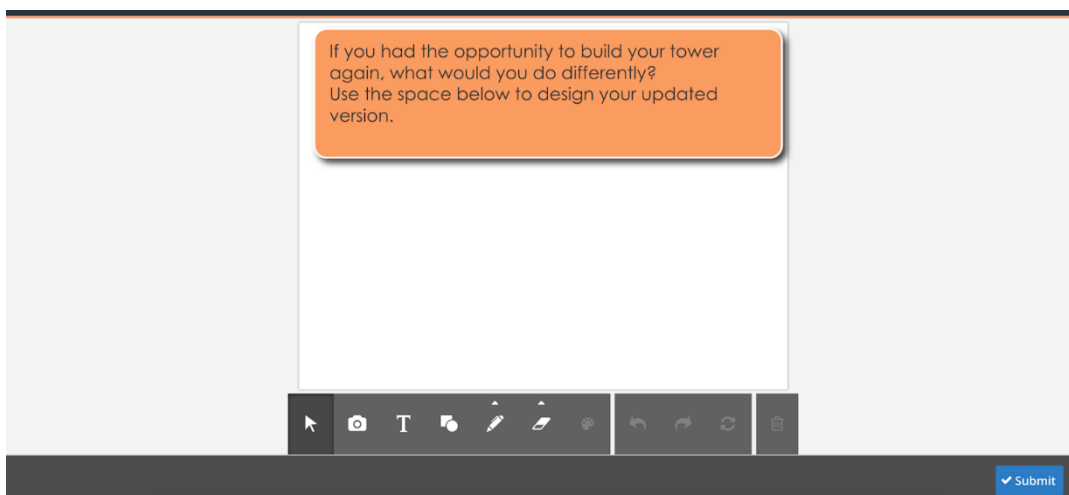

- Regardless of poll type, all poll results are automatically saved within your ClassFlow account.

## Polling Students via Creative Poll

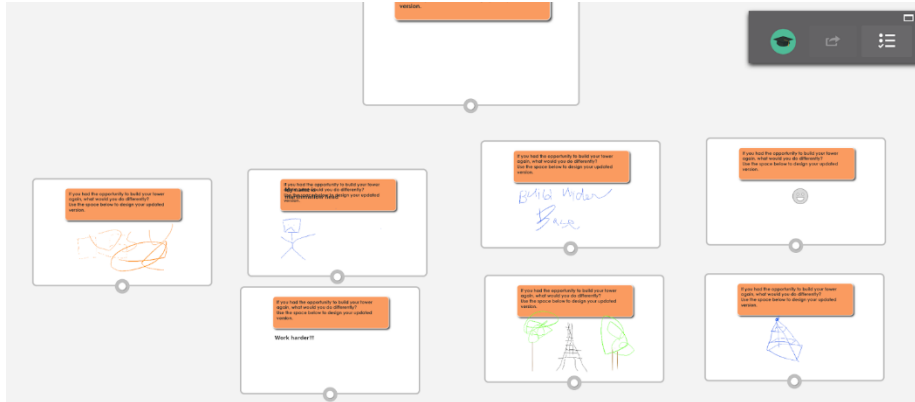

1. One of the most enjoyable ways to engage students and assess learning via ClassFlow is through creative polls.
2. To start a creative poll, go to the polling icon and choose **Creative**.

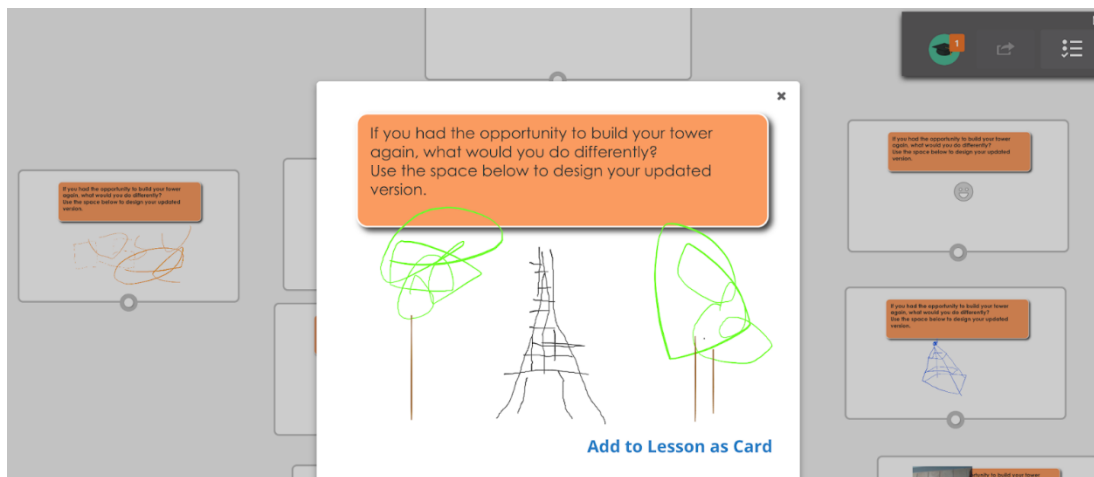

3. Your students will see the card you have displayed at the front of the class on their device and will have a set of tools on the bottom of their screen with which they can interact with the content on the card.

4. Once finished creating their response, students will simply click **Submit** in the lower, right-hand corner. You will then be able to view their cards.
5. Student responses will populate on the front-of-class display in individual boxes.

6. A single click on a student response allows you to change the outline color, delete response, or poll from there. To enlarge a student response, double-click it.

7. You can also select **Add to Lesson as Card** to add the student response to the teacher cards.

## Viewing Student Results After a Lesson

1. To view your polling results after a lesson has ended, go to **Classes**.

2. Choose the class for which you would like to view the polling results.

Note: Polling results will also be saved and available for view under **My Feed**.

3. Select the small arrow to the left of the class name to expand the drop-down menu.

4. Select **Delivered Polls**.

5. From the middle panel, select the lesson from which you would like to view poll results.

6. On the right-hand side of your screen, select **Review**.

7. You will now be able to view all polls from that lesson.

The screenshot displays the CLASSFLOW web application interface. At the top, the navigation bar includes 'Home', 'Classes' (highlighted with a red circle), 'Resources', and 'Marketplace'. The user profile 'Mrs. Domfort's...' is visible in the top right. The left sidebar contains a 'My Feed' section with a dropdown arrow (circled in red) and a list of items including 'Mrs. Domfort's Class', 'Roster', 'Delivered Lessons', 'Delivered Polls' (highlighted with a red circle), 'Delivered Assessments', 'Badges', 'Reading Groups', and 'Prek'. The main content area is titled 'Mrs. Domfort's Class' and 'Delivered Polls'. It features a 'Start Time' dropdown and a list of lessons. The first lesson, 'STEM Engineering - Mrs. Domfort's Class' (dated 10/27/2017 11:11:53 AM), is selected and highlighted with a red circle. Below it are two 'No Lessons played in this session' entries and two other lessons. On the right side of the main panel, the date and time '10/27/2017 11:11:53 AM' are displayed, along with a 'Review' button (circled in red) and a trash icon. The bottom right section shows details for the selected lesson: 'Type: PollSession', 'Started: 10/27/2017 11:11:53 AM', 'Poll Count: 3', and 'Lessons: STEM Engineering - Mrs. Domfort's Class'.

## HELP AND SUPPORT

1. To access ClassFlow help articles and videos, select the question mark in the top right corner.
