

How to Use Teacher and Student Cards in ClassFlow

ClassFlow's teacher and student card tracks are an ideal way to customize your lessons.

Teacher cards appear on your front-of-class display, while student cards appear on connected student devices. To access the teacher and student card tracks in Lesson Builder, select the **Teacher/Student** button in the bottom left.

To add a new student card, simply click the **plus sign** in the student card track. Add content to your student cards in the same way you do with teacher cards. This is a good option if you want the content on the student card to differ from the teacher card.

To mirror the content from the teacher card to the corresponding student card, select the gear on the teacher card and choose **Duplicate to Student Card**. Here's a tip: You may want to anchor objects on your teacher card before duplicating it as a student card.

Student cards are automatically sent to connected student devices by default when you arrive at the corresponding teacher card in Lesson Presenter. You can change this setting by selecting the gear on the student card and **de-selecting Auto-Send**.

To delete a student card, click the gear and select **Delete**.
