

How to Connect to the Internet on Your ActivPanel Nickel

To connect your ActivPanel to the internet, select the **Unified Menu**, then tap **Locker**.

Select the **Settings** icon. Tap **More Settings**.

Select **Network & Internet**. If you have an Ethernet cable connected, this is where you can complete the process.

To connect to a wireless network, toggle the Wi-Fi switch **on**. Select your desired wireless network and input a password if necessary.

Once you have successfully connected, you will see a confirmation below the network name.
