

How to Install Apps from the Promethean Store on Your ActivPanel Nickel

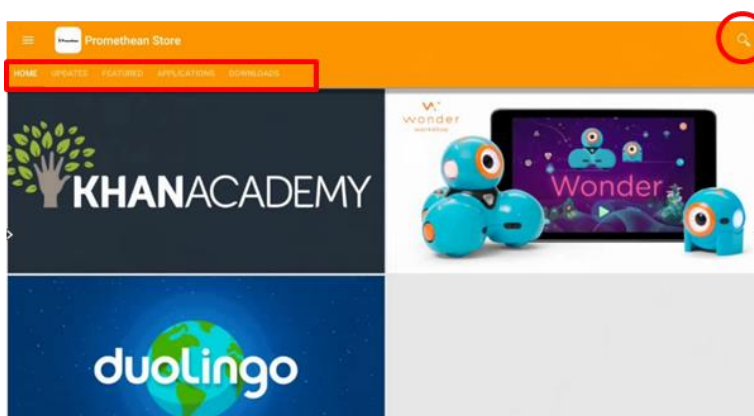

The Promethean Store has a wide variety of educational apps to help supplement your teaching and engage students. To install apps from the Promethean Store, select the **Unified Menu**, then tap **Locker**.

From the **Apps** page within the Locker, select **Promethean Store**.

Once in the store, you may use the tabs to help you locate apps or utilize the search option in the top right corner.

Once you have selected an app, simply tap **Install** to begin the installation process. You may be prompted to confirm installation once more.

Once an app has finished installing, you will receive a confirmation and two options: **Done** and **Open**. Should you tap **Done**, you will be returned to the app page, at which point you may open the app, or use the back arrow in the top left corner to return to the Promethean Store and continue browsing apps. Tap **Open** to immediately open the newly installed app.
