

How to Connect Your Laptop to Your ActivPanel Nickel

To connect your laptop to your ActivPanel, begin with either a VGA or HDMI cable and a USB cable. The VGA or HDMI enables a visual connection, while the USB cable enables touch.

VGA

HDMI

USB

Ports on your ActivPanel are clearly labeled.

If you are connecting a Mac to your ActivPanel using a VGA cable, you may need an additional adapter or dongle. You may also require an audio cable.

You will find additional ports on the back of your ActivPanel. When facing the panel, they are on the left side.

Once you have connected, access the **Unified Menu** and tap **Source** to toggle over to your computer. On an ActivPanel Titanium, you may also use the **Source** button on your **Center Console**.

Remember, you always have access to the Unified Menu, even over connected devices. This means you will also have access to the Classroom Essential Apps.

Use the **Home** button from the **Unified Menu** to return Home at any time.
