

## How to Use the Dual Proximity Sensors on Your ActivPanel Titanium

Dual proximity sensors on the front of the ActivPanel Titanium allow you to quickly power on your panel with a single touch.

As you enter the room and near the ActivPanel, the dual proximity sensors automatically begin the boot up process.

To instantly power on the panel, simply touch the **power button** on the center console. To access Proximity Sensors settings and turn them on or off, select the **Unified Menu**, then **Locker**. Within the Locker, select the **gear icon** for Settings. Then, tap **More Settings**. Select **System**. From here, you may choose to toggle the Proximity Sensors off or on. You may change this setting at any time.
