

How to Use the Promethean Activities Player on Your ActivPanel Titanium

The Promethean Activities Player provides an easy way to access your pre-created ActivInspire activities and engage your students on your Elements Series ActivPanel.

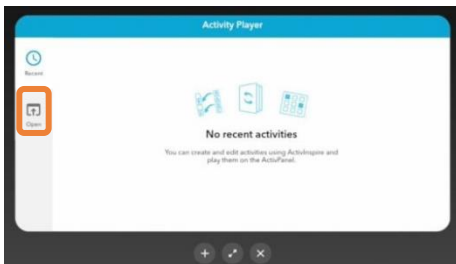

Begin by saving the ActivInspire Activity to a USB, then plug the USB into your Elements Series ActivPanel.

To access your activity on your ActivPanel, tap the **Unified Menu**, then **Locker**.

Select **Activities** from the Apps Menu.

The Activity Player opens. Recently opened activities will display on the Recent tab. Tap the **diagonal arrows** to maximize or minimize the Activity Player.

Tap **Open** to access an activity from your USB.

Tap the **three horizontal lines** in the top left corner and locate your USB. Next, select an Activity.

Two activities may be open at once for a multi-user experience. Tap the **plus sign** to open a second activity. It could be the same activity, or a different one. Multiple students can practice skills and concepts simultaneously.

Tap the **X** to close an activity. Once you close the final activity, you'll be returned to the main window. Tap the **X** once more to return to the home screen.
