

## How to Use the Guest Profile on Your ActivPanel Titanium

Your ActivPanel Titanium has User Profiles that enable multiple educators to make the most of a single ActivPanel. The Guest Profile is ideal for instances in which a guest instructor or substitute is using your classroom.

To begin, select **Guest** from the Sign-In screen.

As a Guest, you will be able to utilize Classroom Essential Apps, access the web, and more. When your Guest session is complete, select the **Unified Menu**, then tap **User**. In this case, it is labeled *Guest*.

Select **Sign Out**.

You will be prompted to delete your session's information or save it for later. Guest session information includes local web data, local app data, and locally stored files.

Regardless of your choice, you will be returned to the Sign-In screen.
