

How to Clear the Cache on Your Android Device

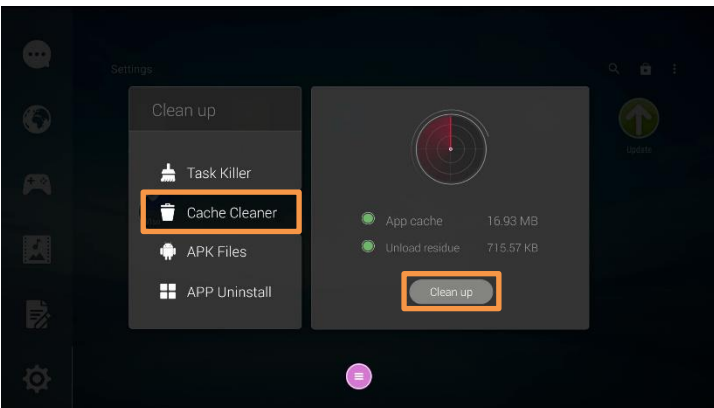

Many Promethean users inquire about clearing the cache on their ActivConnect OPS-G or ActivConnect G.

Begin on the **home screen**. Tap the **App Manager** in the lower left corner.

Select the **Settings** gear on the left. Next, tap **ClearManager**.

Select **Cache Cleaner**. Once the app cache is calculated, tap **Clean Up**. When the cache clearing is complete, you will receive a "Task Completed" confirmation message.
