

How to Close Apps on Your Android Device

Many Promethean users inquire about closing apps on their ActivConnect OPS-G or ActivConnect G. Begin on the **home screen**. **Swipe up** from the bottom of the screen to reveal the Android menu.

Tap the **square** to display all the apps that are currently running on your device. **Swipe to the right or left** to individually close apps. You may also tap the **X** at the bottom of the screen to close all apps at once.
