

How to Manage Apps on Your ActivPanel Nickel

To manage apps installed on your Elements Series ActivPanel, for instance changing notification settings, select the **Unified Menu**, then tap **Locker**.

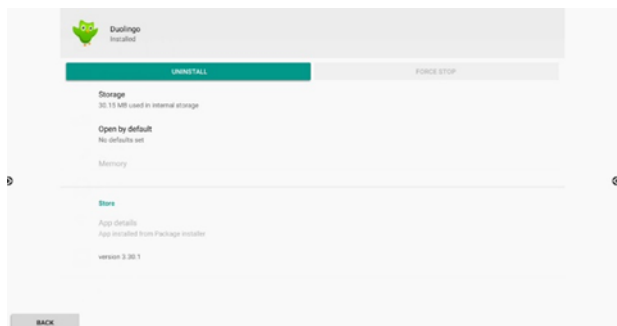

Select the **gear** icon to access Settings. Tap **More Settings**.

Select **Apps** from the Settings menu.

Your apps are listed alphabetically. Scroll to the desired app you wish to view in more detail and tap its **title**.

On the App Info screen, you may need to scroll down to view all of the app's information.

Tap the back arrow in the top left corner to return to your list of apps. Alternatively, you can tap the **Home button** from the **Unified Menu** to return to the home screen.
