ClassFlow Video Recipe

Ingredients

- ClassFlow Cloud-based Software and Account
- YouTube Video
- Lesson to Deliver
- Students Who Desire Engagement

Directions

1. Navigate to ClassFlow.com
 - Locate pre-created lesson from resources or create a new lesson
2. Select the **YouTube video** you wish to embed and select **share**, then **Embed**
3. When the embed code appears, select **Copy**
4. Within ClassFlow, locate a blank card and select the **link** in the lesson creation tool bar
5. Select **Custom HTML**
6. Paste the YouTube embed link using Ctrl+V/Command+V
7. Select **Add to Current Card**
8. Use the handles to size the video to your liking
9. Video is now fully viewable without ads in preview or deliver mode

Serve to your students in live lessons or rostered classes. In rostered classes, card decks can be used as a flipped classroom model to prepare students for upcoming lessons in which you will utilize ClassFlow Polling.
